

Basic installation

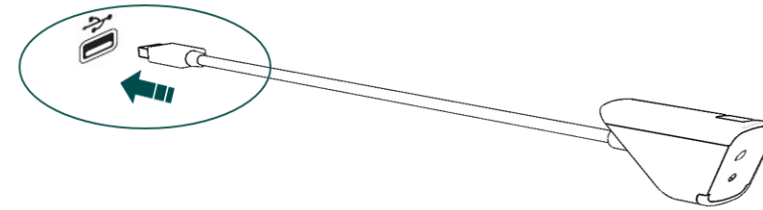

1 Download the Bird application

Go to <https://www.muvinteractive.com/support> and click **Download Now**, in the Bird application window.

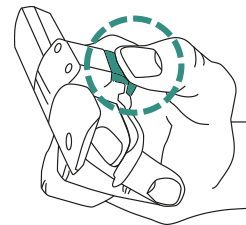

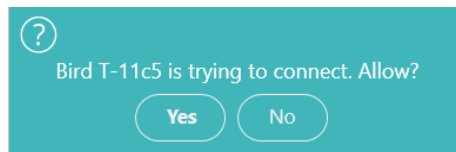

2 Connect the Base Unit

Connect the Base Unit into any USB power source, and it will automatically connect to your computer.

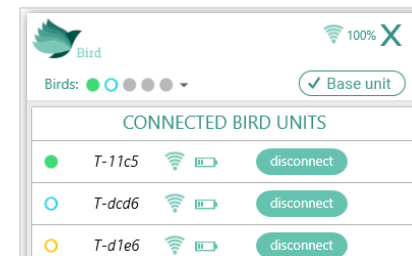

3 Connect Bird

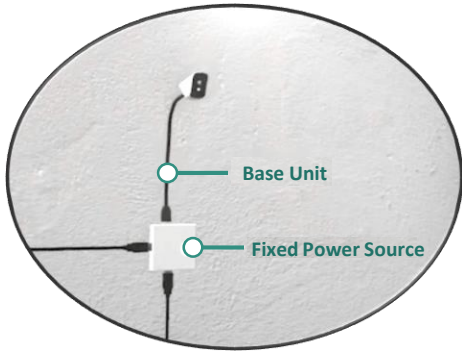

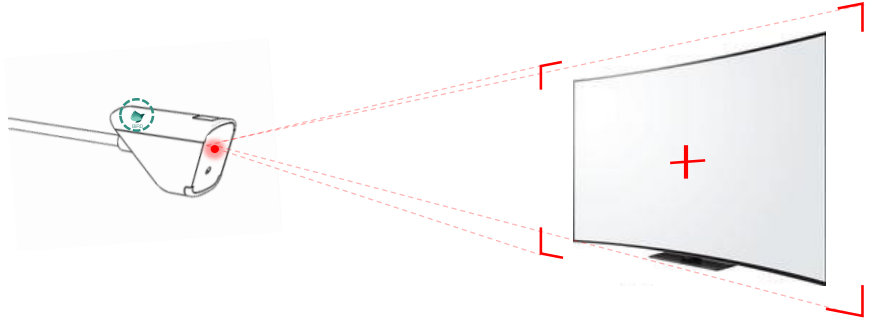

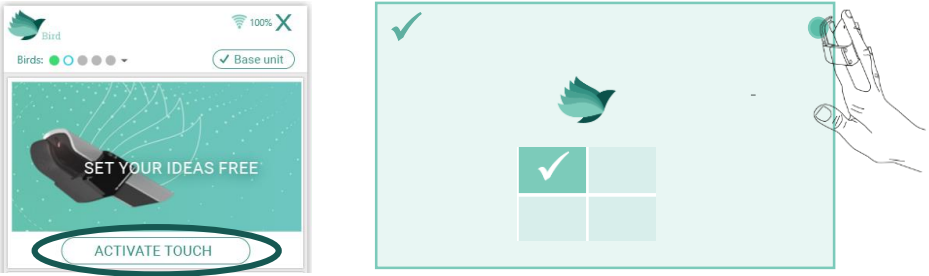

Wear Bird on your right hand index finger, and press the home button for few seconds until you see a message on the screen.

4 Connect additional Birds

To add another Bird repeat the process. The Bird system supports up to 5 connected Birds.

<p>1 Set the Base Unit</p> <p>Connect the Base Unit into a fixed power source.</p> 	<p>2 Activate touch</p> <p>Touch the Bird logo and aim the red laser frame until it covers the entire screen.</p> 
<p>3 Define your interactive area</p> <p>Click 'Activate Touch' in Bird application. Approach the screen and touch the green dots at the 4 corners of the screen.</p> 	<p>4 Repeat the process (when needed)</p> <p>If you move your base unit or if your touch is not precise, repeat this process from Settings -> calibration -> touch calibration -> Calibrate touch</p>
